

MODERN, CLEAN, MOBILE-FIRST

# Appointment booking without the usual form fatigue.

Patients move through one clear question at a time: select a specialty, pick a doctor, choose a time, and confirm.

Your progress is stored locally in this browser so patients can safely resume later.

Recommended production state strategy

- Use a persisted store for the wizard so step data survives refreshes.
- Sync final bookings to backend only after the user confirms.
- Protect each step with validation before moving forward.

## ROLE-BASED ACCESS

## Login with a demo account to open the matching dashboard.

This prototype uses four predefined accounts: Default, Admin, Staff, and User.

[Open Appointment Wizard](#)[Return to Home](#)

## SIGN IN

## Enter a username and password.

Use the credentials below or tap a card to auto-fill the form.
